

НАСТАВНО-НАУЧНОМ ВЕЋУ МЕДИЦИНСКОГ ФАКУЛТЕТА ВОЈНОМЕДИЦИНСКЕ АКАДЕМИЈЕ УНИВЕРЗИТЕТА ОДБРАНЕ У БЕОГРАДУ

Наставно-научно веће Медицинског факултета Војномедицинске академије Универзитета одбране у Београду на седници одржаној 26.09.2019. године одредило је Комисију за утврђивање испуњености услова за избор у научно звање, у следећем саставу:

1. Академик, проф. др Миодраг Чолић, научни саветник,
професор емеритус Медицинског факултета ВМА, Универзитет одбране
2. Проф. др Драгана Вучевић, научни саветник,
Медицински факултет ВМА, Универзитет одбране
3. Проф. др Алекса Трбовић, научни саветник,
Медицински факултет, Универзитет у Београду

Комисија је разматрала пријаву кандидата **Саше Василијића** за реизбор у звање **вишег научног сарадника** за област **природноматематичке науке-биологија** и подноси следећи

И З В Е Ш Т А Ј

1. БИОГРАФСКИ ПОДАЦИ

Др Саша, Ранко, Василијић је рођен 20. септембра 1969. године у Зајечару. Биолошки факултет у Београду, одсек Општа биологија, је завршио 1995. године са просечном оценом 9.15. Од 21. 04.2000. године је у сталном радном односу у Институту за медицинска истраживања, Војномедицинске академије у Београду, где тренутно обавља дужност начелника Одсека за ћелијско и ткивно биоинжињерство.

Последипломске студије из Имунобиологије на Биолошком факултету Универзитета у Београду уписао је школске 1996/97 године, а магистарску тезу под називом "Модулација морфолошких, фенотипских и функционалних својстава дендритичних ћелија тимуса пацова *in vitro* помоћу фактора раста гранулоцитно-моноцитних колонија" успешно је одбранио 2002. године.

На истом факултету је јуна 2008. године одбранио докторску дисертацију под називом: "Модулација функционалних својстава CD11b⁺ и CD11b⁻ субпопулације тимусних дендритичних ћелија пацова *in vitro* помоћу фактора раста гранулоцитно-моноцитних колонија".

У звање научног сарадника је изабран 28.12.2009. године, вишег научног сарадника 26. марта 2015. године. У звање доцента за ужу научну област биологија са хуманом генетиком је изабран 03.12.2009. године, док је у звање ванредног професора изабран 3.12.2014. године на Медицинском факултету Војномедицинске академије Универзитета одбране у Београду.

Од 2011. године др Василијић је на месту начелника Одсека за ћелијско и ткивно биоинжињерство у одељењу за Молекулску медицину, Института за медицинска истраживања ВМА.

Од септембра 2016. године, др Василијић се налази на стручном усавршавању (*Visiting Research Scholar*) на Медицинском факултету Универзитета Харвард (*School of Medicine, Harvard University*) / Болница за око и уво Масачусетса (*Massachusetts Eye and Ear*), Бостон, САД.

2. БИБЛИОГРАФИЈА

2.1. РАДОВИ ОБЈАВЉЕНИ ПРЕ ИЗБОРА У ЗВАЊЕ ВИШИ НАУЧНИ САРАДНИК:

3. АНАЛИЗА РАДОВА (који кандидата квалификују у предложено звање) – кратак опис радова груписаних према сличној проблематици

Преглед објављених радова др Саше Василијић после избора у звање виши научни сарадник показује да се његов научно-истраживачки рад одвијао у неколико паралелних правца истраживања.

У монографији под називом: *Толерогене дендритске ћелије* (201), др Василијић је дао свеобухватан преглед литературних података о улози дендритских ћелија (DC) у централној и периферној имунолошкој толеранцији. Коментаришући резултате својих претходних истраживања, др Василијић указује на улогу фактора стимулације раста колонија гранулоцита и магрофага (GM-CSF) у модулацији функцијских карактеристика субпопулација тимусних DC (TDC), односно стицање толерогених својстава DC током развоја инфламације. Вредност монографије додатно потврђује растућа цитираност ауторских радова др Василијића који су реферисани у његовој монографији. Према ревијалном раду објављеном у часопису *Seminars in Immunology* (Vol. 29, February 2017, page-33-40), у монографији цитирана студија др Василијића о толерогеним DC (18) представља једино, познато истраживање о улози DC у акутној и хроничној инфламацији, као и у процесу заастања ране око имплантirаних биоматеријала. За ову монографију, др Василијић је награђен за ауторски подухват године у области медицинских наука, од стране Управе за војно здравство Министарства одбране Р. Србије (Београд 30. јули 2015. године).

Истраживања из области имунобиологије DC, у којима је учествовао др Василијић у претходном периоду, односе се на изналажење оптималних протокола припреме имуностимулаторних DC (175) и испитивање модулације функције TDC и њихове интеракције са ћелијама тимусне микросредине (194, 198).

У студији изведенoj на хуманим DC моноцитног порекла показано је да 24-часовна диференцијација DC и потоња 48-часовна стимулација њиховог сазревања применом агониста Toll-сличних рецептора -3 (TLR3) може довести до настанка DC са толерогеним карактеристикама (175). Код 7 од укупно 12 донора, DC су испољавале значајно нижу експресију маркера зрелих DC, као и изражено својство усмеравања цитокинског одговора Т лимфоцита ка Th2 профилу. Ове ћелије се одликују и већом експресијом имуно-инхибитрних фактора (попут IL-10 и IDO молекула) и способношћу индукције регулаторних Т лимфоцита. Ови налази указују да се DC могу генерисати применом скраћеног поступка диференцијације (24 часова, уместо 5 дана), међутим њихова функционалност варира између различитих донора, од имуностимулаторних до имуноинхибиторних ћелија. Практични аспект ове студије је спознаја ограничења протокола убрзане припреме DC које би се користиле у имунотерапији тумора.

У студији која се односи на испитивање модулације функцијских карактеристика TDC испитан је ефекат GM-CSF на ендоцитозну активност субпопулација TDC (194). Показано је да су CD11b⁻ DC супериорније у ендоцитози солубилних продуката (декстран), док нема разлике између CD11b⁻ и CD11b⁺ субпопулације TDC у њиховој способности фагоцитозе апоптотичних тимоцита. У односу на деловање GM-CSF, CD11b⁺ TDC одговарају значајно већом ендоцитозном и фагоцитозном активношћу у поређењу са CD11b⁻ субпопулацијом TDC. Резултати ове студије указују да GM-CSF као солубилни фактор тимусне микросредине може имати улогу селективног регулатора процеса интернализације антигена у тимусу. У другој студији у којој је др Василијић учествовао, испитана је експресија DEC-205 молекула на ћелијама тимусне микросредине и његова улога у развоју и функционалној активности Т лимфоцита *in vitro* (198). Показано је да је овај молекул испољен на кортикалним тимусним епителним ћелијама и TDC *in situ*. Применом HD83 моноклонског антитела, које специфично препознаје DEC-205 молекул, долази до активације овог молекула и поспешивања интеракције између тимоцита и TDC *in vitro*, као и апоптозе тимоцита. Значај ових резултата је указивање на могућу недовољно познату улогу DEC-205 молекула у апоптози и селекцији тимоцита.

У протеклом периоду, посебан део истраживања др Василијића је реализован у оквиру научно-истраживачке сарадње на пројектатима других научних установа у земљи и иностранству. У оквиру ове целине издвајају се следећа истраживања:

- испитивање биокомпабилности нових ендодонтских материјала израђених применом савремених технологија наносинтезе (176,178,195) и плазма депозиције (183),
- испитивање анти-туморског ефекта трихинеле (*Trichinella spiralis*) на експериметалном моделу мишјег меланома (179),
- испитивање клиничког значаја нивоа солубилног FAS молекула код пацијената са сепсом (180),
- анализа дистрибуције имунских ћелија у репродуктивном тракту кунића током различитих репродуктивних стања (182).

У овим истраживањима, др Василијић је био носилац *in vitro* испитивања различитих аспекта биологије ћелија (метаболичка активност, пролиферација, некроза, апоптоза) и фенотипске карактеризације ћелија и ткива.

Засебну целину истраживачког рада др Василијића чине истраживања које се реализују у склопу његовог научног усавршавања у САД. Током досадашњег боравка на Универзитету Харвард (септембар 2016. године – октобар 2019. године), др Василијић је активно учествовао у испитивању деловања солубилних фактора тумора шванових ћелија вестибуларног нерва (вестибуларни шваном) на губитак слуха оболелих од овог типа тумора, као и у карактеризацији имунске микросредине унутрашњег уха.

Др Василијић је учествовао у до сада највећој изведеној студији- мета анализи транскриптома вестибуларног шванома, која је за циљ имала идентификацију лека који инхибира раст ћелија вестибуларног шванома. Софтврском анализом електронских база експресије гена (NCBI GEO), биохемијских сигналних путева (*Ingenuity Pathway Analysis*) и алтернативне терапијске примене већ постојећих лекова (*ksRepo*), анализирано је преко 1100 лекова одобрених од стране Америчке агенције за храну и лекове (FDA) и идентификовано неколико лекова као потенцијалних кандидата за лечење вестибуларног шванома. Међу овим лековима, као најефикаснији је идентификован Мифепристон, лек који се у досадашњој клиничкој пракси користио за спречавање нежељене трудноће. Ово истраживање је на *in vitro* моделу показало да Мифепристон значајно инхибира раст вестибуларног шванома. Резултати су објављени у часопису категорије M21, где је др Василијић трећи аутор од укупно 11 аутора (177).

У склопу карактеризације имунске микросредине унутрашњег уха, посебно место чини студија у којој је до сада по први пут анализиран цитокински профил перилимфе унутрашњег уха миша (174). У овој студији је показана изводљивост узорковања $0.5\mu\text{l}$ перилимфе са различитих локација унутрашњег уха. Из ове запремине је могуће урадити анализу цитокинског профила и осталих солубилних маркера који могу имати улогу биомаркера у дијагностици различитих патолошких стања повезаних са губитком слуха. Резултати овог истраживања су показали да међу проинфламаторним медијаторима, рапидно и највеће повећање концентрације у перилимфи након акустичне трауме има CXCL1 хемокин. Поред тога, потпуно неочекиван налаз ове студије је конститутивна експресија CXCL1 у потпорним ћелијама унутрашњег уха под физиолошким условима, што представља први описан налаз ћелијске дистрибуције овог хемокина у унутрашњем уху. Осим тога, у овој студији је показано да улогу CXCL1 рецептора највероватније има DARC-неспецифични хемокински рецептор који местимично колокализује са CXCL1 или је испољен у његовој непосредној близини. Резултати ове студије представљају полазну основу за развој нових дијагностичких процедура код болести унутрашњег уха, пошто је примена биопсије неспорива са очувањем његове функције. Такође, описана експресија CXCL1 у одсуству инфламације указује на могуће постојање до сада непознате улоге овог хемокина у физиологији унутрашњег уха. Др Василијић дели прво ауторство у овом раду.

6. КВАЛИТАТИВНА ОЦЕНА НАУЧНОГ ДОПРИНОСА

6.1 Показатељи успеха у научном раду

Награде и признања за научни рад

Монографија: Толерогене дендритске ћелије (Задужбина Андрејевић, Београд, 2014. ISBN 978-86-525-0181-6) др Василијић је од стране Управе за војно здравство Министарства одбране Р. Србије награђена признањем за ауторски подухват године у области медицинских наука (Београд 30. јули 2015. године).

Уводна предавања на научним конференцијама и друга предавања по позиву

Др Василијић је одржао предавање по позиву на VI Конгрес фармацеута са међународним учешћем, одржаном у Београду од 15. до 19. октобра 2014. године, на тему: „Модулација функције дендритских ћелија фармаколошким агенсима“.

На позив Удружења нефролога Србије, др Василијић је одржао предавање на 8. Школи перитонеумске дијализе (Златибор, 20. септембар 2015. године) на тему: „Генски миље и вијабилност мезотелијалних ћелија“.

У оквиру симпозијума: „Биоинжињерство и медицинска информатика у савременој дијагностици и терапији“ (Београд, 15. мај 2015. године), др Василијић је одржао предавање: „Инжињерски приступи имунотерапији“.

Чланство у научним друштвима

Др Саша Василијић је члан Друштва имунолога Србије од 2000. године, Међународног друштва за дендритске ћелије и вакцине (*International Society for Dendritic Cell & Vaccine Science, New York, USA*) од 2010. године, и Удружења за истраживања у отоларингологији (*Association for Research in Otolaryngology, New Jersey, USA*) од 2019. године.

Рецензије научних радова у часописима са ICI SCI листе

Др Василијић је стални рецензент часописа Војносанитетски преглед за област молекуларне биологије.

6.2 Ангажованост у развоју услова за научни рад, образовању и формирању научних кадрова

Допринос развоју науке у земљи

До одласка на усавршавање у САД (септембар, 2016. године), др Василијић је активно учествовао као сарадник на пројектима: „Регулаторни механизми у запаљенским и имунским реакцијама“ (МФВМА/4/13-15) чији је руководилац проф. др Драгана Вучевић и „Истраживања биокомпабилности наноматеријала и напредних материјала“ (МФВМА/8/13-15) којим је руководио бригадни генерал академик проф. др Миодраг Чолић.

На пројектима Министарства просвете науке и технолошког развоја Р. Србије, др Василијић учествује на пројектима: „Примена функционализованих угљеничних наноцеви и наночестица злата за припрему дендритских ћелија у терапији тумора“ (бр. 175102) и „Синтеза, развој технологија добијања и примена наноструктурних мултифункционалних материјала дефинисаних својстава“ (бр. 45019). Ови пројекти се реализују на Институту за примену нуклеарне енергије „ИНЕП“ у Београду под руководством академика Миодрага Чолића и на Технолошко-металуршком факултету Универзитета у Београду под руководством проф. др Ђорђа Јанаћковића. Др Василијић је и сарадник на пројекту „Имунобиологија дендритичних ћелија у здрављу и болести“, САНУ, под руководством академика Миодрага Чолића.

Др Василијић је био члан Наставно-научног већа Медицинског факултета ВМА од 2009. до 2018. године. У периоду од децембра 2014. до марта 2017. године, др Василијић је учествовао у раду Одбора за научно-истраживачку делатност Наставно-научног већа Медицинског факултета ВМА.

У склопу активности Одбора, др Василијић је учествовао у рецензији једног научно-истраживачког пројекта (“Генетска варијабилност болесника са хематолошким малигнитетима”, научни сарадник др Бојана Џикота-Алексић, јун 2015), као и комисији за избор у научно звање (др Сређан Томић, звање научни сарадник, јануар 2015).

Менторство при изради мастер, магистарских и докторских радова, руковођење специјалистичким радовима

У периоду од избора у звање вишег научног сарадника, др Василијић је учествовао у комисијама за оцену и одбрану једног мастер рада и две докторске дисертације. Др Саша Василијић има једно коменторство у изради докторског рада, чија је израда у току (др Владимир Турунташ).

Чланство у комисијама

Комисија за преглед и оцену мастер рада под називом: „Сојне разлике у локалном и системском имунском одговору у фази експресије реакције контактне преосетљивости на динитрохлоробензен у пацова“, кандидата Јелене Јовановић, Биолошки факултет, Универзитет у Београду (одлука: 15/259 од 12.06.2015. године).

Комисија за преглед и оцену и одбрану докторског рада под називом: “Топографија женских полних органа калифорнијског кунића Oryctolagus cuniculus domesticus”, докторанд mr Валентина Милановић: Факултет ветеринарске медицине, Универзитет у Београду (одлука: 01-15/48 од 23.12.2015. године, одлука: 01-24/5 од 23.03.2016. године, датум одбране доктората: 15.06.2016. године).

Комисија за преглед и оцену докторског рада под називом: „Имуноимодулаторни ефекти антикоагуланата варфарина код пацова“, докторанд mr Весна Субота: Биолошки факултет, Универзитет у Београду (одлука: 15/197 од 13.05.2016. године).

Коменторство у изради докторске дисертације:

1. mr dr med. Владимир Турунташ: “Дејство сталног магнетског поља на функцијске карактеристике хуманих мононуклеарних ћелија периферне крви *in vitro*“. Медицински факултет, Универзитет у Београду (одлука: 5940/2 од 24.12.2015. године)

Педагошки рад

У периоду од избора у звање вишег научног сарадника, др Василијић је у звању ванредног професора ангажован у извођењу наставе на Медицинском факултету ВМА Универзитета Одбране.

На интегрисаним академским студијама медицине на Медицинском факултету ВМА, др Василијић је наставник на предметима: Биологија са хуманом генетиком, Клиничка генетика, Биологија ћелије (руководилац предмета).

На академским специјалистичким студијама из Биоинжињерства и медицинске информатике на Медицинском факултету ВМА, др Василијић је наставник на предмету Имунологија и биологија ћелије за инжињере.

Од школске 2013/2014. др Василијић је ангажован на докторским студијама на Медицинском факултету ВМА, на којим учествује у настави на предметима: Хомеостаза и регулаторни механизми и Експериментални модели у биомедицини.

У досадашњем наставном раду, др Василијић је испољио стручност и вештину у излагању материје, као и спремност за пружање доданих информација у циљу мотивисања студената за научна истраживања. Поред тога, педагошки рад др Василијића укључује и менторски рад са кадетима на интегрисаним академским студијама медицине Медицинског факултета ВМА (једно менторство кадет Филип Мерњик, од октобра 2013. до септембра 2016. године).

Учешће у међународној сарадњи

У склопу међународне сарадње Универзитета одбране у Београду, др Василијић је у својству руководиоца тима (*Key person*), у периоду од октобра 2012. до јуна 2016. године, учествовао на ТЕМПУС пројекту: „Студије у биоинжињерингу и медицинској информатици“ (BioEMIS, 530423-TEMPUS-1-2012-1-UK-TEMPUS-JPCR). У склопу овог пројекта формиране су и акредитоване специјалистичке академске студије из биоинжињеринга и медицинске информатике на Медицинском факултету ВМА.

У оквиру усавршавања на Медицинском факултету Универзитета Харвард, од септембра 2016. године па надаље, др Василијић учествује у реализацији пројекта: Механизми сензоринеуралног губитка слуха: секреторни фактори (*Mechanisms of sensorineural hearing loss: secreted factors, 5R01DC015824-03*), који финансирају Национални институти за здравље, САД (*National Institutes of Health, Bethesda, Maryland, USA*). Пројекат се изводи у Болници за око и уво Масачусетса (*Massachusetts Eye and Ear*), Бостон, САД. На овом пројекту, др Василијић учествује у истраживањима везаним за испитивање молекулских маханизама деловања солубилних фактора туморске микросредине вестибуларног шванома на губитак слуха код особа оболелих од овог типа тумора. Поред тога, др Василијић учествује у испитивању имунске микросредине унутрашњег уха, радећи на моделима који укључују и примену индукованих плурипотентних матичних ћелија. Резултате својих досадашњих истраживања, са афилијацијом Медицинског факултета Универзитета Харвард, објавио је у два рада у којима дели прво ауторство и коауторство (174, 177).

Организација научних и стручних скупова

У мају 2015. године, на Војномедицинској академији у Београду, др Василијић је био организатор стручног симпозијума: „Биоинжињерство и медицинска информатика у савременој дијагностици и терапији“ (Београд, 15. мај 2015. године), на коме је председавао једном од сесија и излагао као предавач.

На VII Научном састанку Друштва имунолога Србије, који је одржан од 27. до 28. априла 2016. године у САНУ у Београду, др Василијић је био председавајући сесије: Имуномодулација.

6.3 Организација научног рада

Руковођење пројектима, потпројектима, задацима

До одласка на стручно усавршавање у САД, (септембар 2016. године), др Василијић је руководио пројектом под називом: „Функционални аспекти модулације имуногених и толерогених својстава дендритских ћелија (МФВМА/10/13-15, МФВМА/9/16-18), које је финансирало Министарство одбране Р. Србије. Пројекат се реализовао од 2013. године на Медицинском факултету ВМА Универзитета одбране у Београду.

У оквиру овог пројекта урађен је део докторске дисертације др Ивана Рајковића, под називом “Модулација диференцијације и функција хуманих лангерхансових ћелија моноцитног порекла *in vitro*“. Дисертација је одбрањена на Медицинском факултету Универзитета у Београду 13.07.2015. године. Из овог доктората произашла је и заједничка публикација са др Рајковићем у часопису M22 категорије (13).

6.4 Квалитет научних резултата

Резултати научно-истраживачког рада др Саше Василијића су објављени у укупно 199 библиографских јединица, осим објављене магистарске тезе и докторске дисертације. Укупан број објављених научних радова штампаних у целини је 57. Од тога је један рад у тематском зборнику међународног значаја (M14), 12 радова у врхунским међународним часописима (M21), 6 радова у истакнутим међународним часописима (M22), 20 радова у међународним часописима (M23), једно предавање по позиву са међународног скупа штампано у изводу, 6 саопштења са међународног скупа штампана у целини (M33), једна монографија националног значаја (M42), два поглавља у књигама националног значаја (M45), 4 рада у водећем часопису националног значаја (M51), и 8

радова у научном часопису (M53). Др Василијић има **138** саопштења на међународним и домаћим научним скуповима и штампаних у изводу. Од тога је **109** саопштења на скуповима међународног (M34), и **29** саопштења на скуповима националног значаја (M64). Збирни импакт фактор објављених радова је **72,966**. Радови др Василијића су без аутоцитата цитирани у **529** радова, са хиршовим индексом **13** (WOS).

Од избора у звање виши научни сарадник, односно после одлуке наставно-научног већа о предлогу за стицање звања виши научни сарадник, др Василијић је објавио **једну** монографију националног значаја (M42) и **13** радова штампаних у целини. Од радова штампаних у целини, **један** рад је у тематском зборнику међународног значаја (M14), **три** рада у врхунским међународним часописима (M21), **један** рад у истакнутом међународном часопису (M22), **6** радова у међународним часописима (M23) и **два** рада у научном часопису (M53). Др Василијић има **једно** предавање по позиву са међународног скупа штампано у изводу (M32), **11** саопштења са међународних скупова (M34) и **два** саопштења са скупова националног значаја (M64) штампаних у изводу. Збирни импакт фактор објављених радова је **18,211**. Просечан број коаутора у радовима др Василијића након избора у звање виши научни сарадник износи 7,09. Од 13 укупно објављених радова *in extenso*, др Василијић је први аутор у два рада, од којих у једном дели прво ауторство.

На основу захтева Правилника, за реизбор у звање вишег научног сарадника је потребно 25 поена (половина од 50 поена), од чега др Василијић има **65,4 поена** (56,51 нормираних). За групу радова-Обавезни 1, остварено је 57,5 поена (49,25 нормираних) од потребних 20, док је за групу радова-Обавезни 2 остварено 47 поена (38,75 нормираних) од потребних 15.

Табеле у прилогу дају сажети преглед постигнутих резултата научног рада др Саше Василијића до избора у звање виши научни сарадник (Табела 1) и након избора у звање виши научни сарадник (Табела 2).

7. ТАБЕЛА СА РЕЗУЛТАТИМА НАУЧНО-ИСТРАЖИВАЧКОГ РАДА

Сумарни приказ резултата научно-истраживачког рада др Саше Василијић :

Квантитативни показатељи научног рада пре избора у звање виши научни сарадник			
Назив групе резултата	Ознака групе резултата и вредност (број поена)	Број остварених резултата	Укупан број остварених поена
Међународни научни часописи (M20)	M21 = 8	9	72
	M22 = 5	5	25
	M23 = 3	14	42
Зборници међународних скупова (M30)	M33 = 1	6	6
	M34 = 0.5	98	49
Националне монографије и тематски зборници (M40)	M45 = 1.5	2	3
Радови у часописима националног значаја (M50)	M51= 2	4	8
	M53= 1	6	6
Зборници скупова националног значаја (M60)	M64 = 0.2	27	5.4
Магистрска и докторска теза (M70)	M71 = 6	1	6
	M72 = 3	1	3
Обавезни (1): M10+M20+M31+M32+M33+M41+M42		34	145
Обавезни (2): M11+M12+M21+M22+M23		28	139
УКУПНО		173	225.4

Квантитативни показатељи научног рада после избора у звање виши научни сарадник

Назив групе резултата	Ознака групе резултата и вредност	Број остварених резултата	Укупно поена	Нормиран број поена (више од 7 аутора)
Поглавља у монографијама и тематским зборницима (M10)	M14 = 4	1	4	4
Међународни научни часописи (M20)	M21 = 8	3	24	17.44
	M22 = 5	1	5	4.17
	M23 = 3	6	18	17.14
Зборници међународних скупова (M30)	M32= 1.5	1	1.5	1.5
	M34 = 0.5	11	5.5	4.92
Националне монографије и тематски зборници (M40)	M42 = 5	1	5	5
Радови у часописима националног значаја (M50)	M53 = 1	2	2	2
Зборници скупова националног значаја (M60)	M64 = 0.2	2	0.4	0.34
Обавезни (1) M10+M20+M31+M32+M33+ M41+M42+M90 (40)		13	57.5	49.25
Обавезни (2) M11+M12+M21+M22+M23 (30)		10	47	38.75
УКУПНО		28	65,4	56.51

**МИНИМАЛНИ КВАНТИТАТИВНИ ЗАХТЕВИ ЗА СТИЦАЊЕ ПОЈЕДИНАЧНИХ
НАУЧНИХ ЗВАЊА**

За природно-математичке и медицинске струке

Диференцијални услов-	потребно је да кандидат има најмање XX поена, који треба да припадају следећим категоријама:		
Од првог избора у претходно звање до избора у звање.....		НеопходноXX=	Остварено
Виши научни сарадник	Укупно	50	65.4 (56.51*)
Обавезни (1)	M10+M20+M31+M32+M33+M41+M42+M90	40	57.5 (49.25*)
Обавезни (2)	M11+M12+M21+M22+M23	30	47 (38.75*)

(*) - нормиран број поена

Нормирање радова је извршено на основу Прилога 1. Правилника, под 1.4 Нормирање броја коауторских радова, патената и техничких решења (шести став), дељењем броја бодова у радовима са више од седам коаутора, према формули: $K/(1+0,2(n-7))$, $n>7$ (K - број "бодова рада према категорији", n – број аутора).

За реизбор у научно звање виши научни сарадник кандидат је обавезан да у периоду од пет година испуни најмање половину минималних квантитативних резултата потребних за избор у научно звање виши научни сарадник (Члан 35. став 2, Правилник о поступку, начину вредновања и квантитативном исказивању научноистраживачких резултата истраживача).

8. ЗАКЉУЧАК И ПРЕДЛОГ КОМИСИЈЕ

(за одлучивање упућен Наставно-научном већу, са назнаком из које шире и уже научне области, гране и дисциплине, кандидат стиче звање)

На основу увида у комплетну библиографски материјал др Саше Василијића, Комисија закључује се да др Василијић успешно бави истраживањима из области базичне имунологије са посебним освртом на испитивању функционалних особина дендритских ћелија у циљу развоја оптималних протокола модулације њихове функције.

У периоду од избора у звање вишег научног сарадника, његов научноистраживачки рад се реализује на три пројекта Министарства одбране и два пројекта Министарства просвете науке и технолошког развоја Р. Србије и пројекту Националног Института за здравље САД. У свом научноистраживачком раду, др Василијић користи савремене истраживачке технике и самостално учествује у областима истраживања дендритских ћелија. Искуства стечена у његовом досадашњем раду квалификовала су га да руководи научноистраживачким пројектом који је финансиран од стране Министарства одбране Р. Србије. У свим фазама рада, др Василијић испољава кооперативност, иницијативу у тимском раду, као и способност преноса сопствених искустава и знања, чиме пружа допринос образовању младих истраживача. У досадашњем наставном раду, др Василијић показује изузетну стручност и вештину у излагању материје, као и спремност за пружање додатних информација у циљу мотивисања студената за научна истраживања. Учествовао је у изради више магистарских и докторских теза, а након избора у звање вишег научног сарадника био је ангажован као члан комисије у оцени и одбрани једне докторске дисертације, као и оцени једног магистарског рада и једне докторске дисертације. Др Саша Василијић је тренутно коментор у изради једног докторског рада, чија је научна заснованост одобрена, а реализација у току.

Преглед објављених радова после избора у звање научног сарадника показује да се научноистраживачки рад др Саше Василијић одвијао у неколико истраживачких правца који указују и на његово учешће у реализацији научноистраживачке активности и у осталим научним центрима у земљи и иностранству.

На основу прегледа целокупне публицистичке активности, анализе научноистраживачког рада, процене научних и стручних квалитета и увида у остале пратеће активности кандидата, сматрамо да виши научни сарадник др Саша Василијић испуњава све услове предвидјене Законом о научноистраживачком раду и Правилником о избору у научна звања за реизбор у звање виши научни сарадник и предлажемо Наставно-научном већу Медицинског факултета Војномедицинске академије да утврди испуњеност услова за овај реизбор.

У Београду, 22. 10. 2019.

ЧЛНОВИ КОМИСИЈЕ:

М. Голић

Академик проф. др Миодраг Чолић, научни саветник
професор емеритус Медицинског факултета ВМА, Универзитет одбране у Београду

Д. Чолић

Проф. др Драгана Вучевић, научни саветник
Медицински факултет ВМА, Универзитет одбране у Београду

Д. Вучевић

Проф. др Алекса Трбовић, научни саветник,
Медицински факултет, Универзитет у Београду

НАСТАВНО-НАУЧНОМ ВЕЋУ МЕДИЦИНСКОГ ФАКУЛТЕТА ВОЈНОМЕДИЦИНСКЕ АКАДЕМИЈЕ УНИВЕРЗИТЕТА ОДБРАНЕ У БЕОГРАДУ

Наставно-научно веће Медицинског факултета Војномедицинске академије Универзитета одбране у Београду на седници одржаној 26.09.2019. године одредило је Комисију за утврђивање испуњености услова за избор у научно звање, у следећем саставу:

1. Академик, проф. др Миодраг Чолић, научни саветник,
професор емеритус Медицинског факултета ВМА, Универзитет одбране
2. Проф. др Драгана Вучевић, научни саветник,
Медицински факултет ВМА, Универзитет одбране
3. Проф. др Алекса Трбовић, научни саветник,
Медицински факултет, Универзитет у Београду

Комисија је разматрала пријаву кандидата **Саше Василијића** за реизбор у звање **вишег научног сарадника** за област **природноматематичке науке-биологија** и подноси следећи

И З В Е Ш Т А Ј

1. БИОГРАФСКИ ПОДАЦИ

Др Саша, Ранко, Василијић је рођен 20. септембра 1969. године у Зајечару. Биолошки факултет у Београду, одсек Општа биологија, је завршио 1995. године са просечном оценом 9.15. Од 21. 04.2000. године је у сталном радном односу у Институту за медицинска истраживања, Војномедицинске академије у Београду, где тренутно обавља дужност начелника Одсека за ћелијско и ткивно биоинжињерство.

Последипломске студије из Имунобиологије на Биолошком факултету Универзитета у Београду уписао је школске 1996/97 године, а магистарску тезу под називом "Модулација морфолошких, фенотипских и функционалних својстава дендритичних ћелија тимуса пацова *in vitro* помоћу фактора раста гранулоцитно-моноцитних колонија" успешно је одбранио 2002. године.

На истом факултету је јуна 2008. године одбранио докторску дисертацију под називом: "Модулација функционалних својстава CD11b⁺ и CD11b⁻ субпопулације тимусних дендритичних ћелија пацова *in vitro* помоћу фактора раста гранулоцитно-моноцитних колонија".

У звање научног сарадника је изабран 28.12.2009. године, вишег научног сарадника 26. марта 2015. године. У звање доцента за ужу научну област биологија са хуманом генетиком је изабран 03.12.2009. године, док је у звање ванредног професора изабран 3.12.2014. године на Медицинском факултету Војномедицинске академије Универзитета одбране у Београду.

Од 2011. године др Василијић је на месту начелника Одсека за ћелијско и ткивно биоинжињерство у одељењу за Молекулску медицину, Института за медицинска истраживања ВМА.

Од септембра 2016. године, др Василијић се налази на стручном усавршавању (*Visiting Research Scholar*) на Медицинском факултету Харвард (*School of Medicine, Harvard University*) / Болница за око и уво Масачусетса (*Massachusetts Eye and Ear*), Бостон, САД.

2. БИБЛИОГРАФИЈА

3. АНАЛИЗА РАДОВА (који кандидата квалификују у предложено звање) – кратак опис радова груписаних према сличној проблематици

Преглед објављених радова др Саше Василијић после избора у звање виши научни сарадник показује да се његов научно-истраживачки рад одвијао у неколико паралелних правца истраживања.

У монографији под називом: *Толерогене дендритске ћелије* (201), др Василијић је дао свеобухватан преглед литературних података о улози дендритских ћелија (DC) у централној и периферној имунолошкој толеранцији. Коментаришући резултате својих претходних истраживања, др Василијић указује на улогу фактора стимулације раста колонија гранулоцита и магрофага (GM-CSF) у модулацији функцијских карактеристика субпопулација тимусних DC (TDC), односно стицање толерогених својстава DC током развоја инфламације. Вредност монографије додатно потврђује растућа цитирања ауторских радова др Василијића који су реферисани у његовој монографији. Према ревијалном раду објављеном у часопису *Seminars in Immunology* (Vol. 29, February 2017, page-33-40), у монографији цитирана студија др Василијића о толерогеним DC (18) представља једино, познато истраживање о улози DC у акутној и хроничној инфламацији, као и у процесу зарастања ране око имплантirаних биоматеријала. За ову монографију, др Василијић је награђен за ауторски подухват године у области медицинских наука, од стране Управе за војно здравство Министарства одбране Р. Србије (Београд 30. јули 2015. године).

Истраживања из области имунобиологије DC, у којима је учествовао др Василијић у претходном периоду, односе се на изналачење оптималних протокола припреме имуностимулаторних DC (175) и испитивање модулације функције TDC и њихове интеракције са ћелијама тимусне микросредине (194, 198).

У студији изведеној на хуманим DC моноцитног порекла показано је да 24-часовна диференцијација DC и потоња 48-часовна стимулација њиховог сазревања применом агониста Toll-сличних рецептора -3 (TLR3) може довести до настанка DC са толерогеним карактеристикама (175). Код 7 од укупно 12 донора, DC су испољавале значајно нижу експресију маркера зрелих DC, као и изражено својство усмеравања цитокинског одговора Т лимфоцита ка Th2 профилу. Ове ћелије се одликују и већом експресијом имуно-инхибитронах фактора (попут IL-10 и IDO молекула) и способношћу индукције регулаторних Т лимфоцита. Ови налази указују да се DC могу генерисати применом скраћеног поступка диференцијације (24 часова, уместо 5 дана), међутим њихова функционалност варира између различитих донора, од имуностимулаторних до имуноинхибиторних ћелија. Практични аспект ове студије је спознаја ограничења протокола убрзане припреме DC које би се користиле у имунотерапији тумора.

У студији која се односи на испитивање модулације функционалних карактеристика TDC испитан је ефекат GM-CSF на ендоцитозну активност субпопулација TDC (194). Показано је да су CD11b⁻ DC супериорније у ендоцитози солубилних продуката (декстран), док нема разлике између CD11b⁻ и CD11b⁺ субпопулације TDC у њиховој способности фагоцитозе апоптотичних тимоцита. У односу на деловање GM-CSF, CD11b⁺ TDC одговарају значајно већом ендоцитозном и фагоцитозном активношћу у поређењу са CD11b⁻ субпопулацијом TDC. Резултати ове студије указују да GM-CSF као солубилни фактор тимусне микросредине може имати улогу селективног регулатора процеса интернализације антигена у тимусу. У другој студији у којој је др Василијић учествовао, испитана је експресија DEC-205 молекула на ћелијама тимусне микросредине и његова улога у развоју и функционалној активности Т лимфоцита *in vitro* (198). Показано је да је овај молекул испољен на кортикалним тимусним епителним ћелијама и TDC *in situ*. Применом HD83 моноклонског антитела, које специфично препознаје DEC-205 молекул, долази до активације овог молекула и посређивања интеракције између тимоцита и TDC *in vitro*, као и апоптозе тимоцита. Значај ових резултата је указивање на могућу недовољно познату улогу DEC-205 молекула у апоптози и селекцији тимоцита.

У протеклом периоду, посебан део истраживања др Василијића је реализован у оквиру научно-истраживачке сарадње на пројектатима других научних установа у земљи и иностранству. У оквиру ове целине издвајају се следећа истраживања:

- испитивање биокомпатибилности нових ендодонтских материјала израђених применом савремених технологија наносинтезе (176,178,195) и плазма депозиције (183),
- испитивање анти-туморског ефекта трихинеле (*Trichinella spiralis*) на експериметалном моделу мишјег меланома (179),
- испитивање клиничког значаја нивоа солубилног FAS молекула код пацијената са сепсом (180),
- анализа дистрибуције имунских ћелија у репродуктивном тракту кунића током различитих репродуктивних стања (182).

У овим истраживањима, др Василијић је био носилац *in vitro* испитивања различитих аспекта биологије ћелија (метаболичка активност, пролиферација, некроза, апоптоза) и фенотипске карактеризације ћелија и ткива.

Засебну целину истраживачког рада др Василијића чине истраживања које се реализују у склопу његовог научног усавршавања у САД. Током досадашњег боравка на Универзитету Харвард (септембар 2016. године – октобар 2019. године), др Василијић је активно учествовао у испитивању деловања солубилних фактора тумора шванових ћелија вестибуларног нерва (вестибуларни шваном) на губитак слуха оболелих од овог типа тумора, као и у карактеризацији имунске микросредине унутрашњег уха.

Др Василијић је учествовао у до сада највећој изведеној студији- мета анализи транскриптома вестибуларног шванома, која је за циљ имала идентификацију лека који инхибира раст ћелија вестибуларног шванома. Софтверском анализом електронских база експресије гена (NCBI GEO), биохемијских сигналних путева (*Ingenuity Pathway Analysis*) и алтернативне терапијске примене већ постојећих лекова (*ksRepo*), анализирано је преко 1100 лекова одобрених од стране Америчке агенције за храну и лекове (FDA) и идентификовано неколико лекова као потенцијалних кандидата за лечење вестибуларног шванома. Међу овим лековима, као најефикаснији је идентификован Мифепристон, лек који се у досадашњој клиничкој пракси користио за спречавање нежељене трудноће. Ово истраживање је на *in vitro* моделу показало да Мифепристон значајно инхибира раст вестибуларног шванома. Резултати су публиковани у часопису категорије M21, где је др Василијић трећи аутор од укупно 11 аутора (177).

У склопу карактеризације имунске микросредине унутрашњег уха, посебно место чини студија у којој је до сада по први пут анализиран цитокински профил перилимфе унутрашњег уха миша (174). У овој студији је показана изводљивост узорковања $0.5\mu\text{l}$ перилимфе са различитих локација унутрашњег уха. Из ове запремине је могуће урадити анализу цитокинског профила и осталих солубилних маркера који могу имати улогу биомаркера у дијагностици различитих патолошких стања повезаних са губитком слуха. Резултати овог истраживања су показали да међу проинфламаторним медијаторима, рапидно и највеће повећање концентрације у перилимфи након акустичне трауме има CXCL1 хемокин. Поред тога, потпуно неочекиван налаз ове студије је конститутивна експресија CXCL1 у потпорним ћелијама унутрашњег уха под физиолошким условима, што представља први описан налаз ћелијске дистрибуције овог хемокина у унутрашњем уху. Осим тога, у овој студији је показано да улогу CXCL1 рецептора највероватније има DARC-неспецифични хемокински рецептор који местимично колокализује са CXCL1 или је испољен у његовој непосредној близини. Резултати ове студије представљају полазну основу за развој нових дијагностичких процедура код болести унутрашњег уха, пошто је примена биопсије неспорива са очувањем његове функције. Такође, описана експресија CXCL1 у одсуству инфламације указује на могуће постојање до сада непознате улоге овог хемокина у физиологији унутрашњег уха. Др Василијић дели прво ауторство у овом раду.

6. КВАЛИТАТИВНА ОЦЕНА НАУЧНОГ ДОПРИНОСА

6.1 Показатељи успеха у научном раду

Награде и признања за научни рад

Монографија: Толерогене дендритске ћелије (Задужбина Андрејевић, Београд, 2014. ISBN 978-86-525-0181-6) др Василијића је од стране Управе за војно здравство Министарства одбране Р. Србије награђена признањем за ауторски подухват године у области медицинских наука (Београд 30. јули 2015. године).

Уводна предавања на научним конференцијама и друга предавања по позиву

Др Василијић је одржао предавање по позиву на VI Конгресу фармацеута са међународним учешћем, одржаном у Београду од 15. до 19. октобра 2014. године, на тему: „Модулација функције дендритских ћелија фармаколошким агенсима“.

На позив Удружења нефролога Србије, др Василијић је одржао предавање на 8. Школи перитонеумске дијализе (Златибор, 20. септембар 2015. године) на тему: „Генски миље и вијабилност мезотелијалних ћелија“.

У оквиру симпозијума: „Биоинжињерство и медицинска информатика у савременој дијагностици и терапији“ (Београд, 15. мај 2015. године), др Василијић је одржао предавање: „Инжињерски приступи имунотерапији“.

Чланство у научним друштвима

Др Саша Василијић је члан Друштва имунолога Србије од 2000. године, Међународног друштва за дендритске ћелије и вакцине (*International Society for Dendritic Cell & Vaccine Science, New York, USA*) од 2010. године, и Удружења за истраживања у отоларингологији (*Association for Research in Otolaryngology, New Jersey, USA*) од 2019. године.

Рецензије научних радова у часописима са ICI SCI листе

Др Василијић је стални рецензент часописа Војносанитетски преглед за област молекуларне биологије.

6.2 Ангажованост у развоју услова за научни рад, образовању и формирању научних кадрова Допринос развоју науке у земљи

До одласка на усавршавање у САД (септембар, 2016. године), др Василијић је активно учествовао као сарадник на пројектима: „Регулаторни механизми у запаљенским и имунским реакцијама“ (МФВМА/4/13-15) чији је руководилац проф. др Драгана Вучевић и „Истраживања биокомпабилности наноматеријала и напредних материјала“ (МФВМА/8/13-15) којим је руководио бригадни генерал академик проф. др Миодраг Чолић.

На пројектима Министарства просвете науке и технолошког развоја Р. Србије, др Василијић учествује на пројектима: „Примена функционализованих угљеничних наноцеви и наночестица злата за припрему дендритских ћелија у терапији тумора“ (бр. 175102) и „Синтеза, развој технологија добијања и примена наноструктурних мултифункционалних материјала дефинисаних својстава“ (бр. 45019). Ови пројекти се реализују на Институту за примену нуклеарне енергије „ИНЕП“ у Београду под руководством академика Миодрага Чолића и на Технолошко-металуршком факултету Универзитета у Београду под руководством проф. др Ђорђа Јанаћковића. Др Василијић је и сарадник на пројекту „Имунобиологија дендритичних ћелија у здрављу и болести“, САНУ, под руководством академика Миодрага Чолића.

Др Василијић је био члан Наставно-научног већа Медицинског факултета ВМА од 2009. до 2018. године. У периоду од децембра 2014. до марта 2017. године, др Василијић је учествовао у раду Одбора за научно-истраживачку делатност Наставно-научног већа Медицинског факултета ВМА.

У склопу активности Одбора, др Василијић је учествовао у рецензији једног научно-истраживачког пројекта (“Генетска варијабилност болесника са хематолошким малигнитетима”, научни сарадник др Ђојана Џикота-Алексић, јун 2015), као и комисији за избор у научно звање (др Сређан Томић, звање научни сарадник, јануар 2015).

Менторство при изради мастер, магистарских и докторских радова, руковођење специјалистичким радовима

У периоду од избора у звање вишег научног сарадника, др Василијић је учествовао у комисијама за оцену и одбрану једног мастер рада и две докторске дисертације. Др Саша Василијић има једно коменторство у изради докторског рада, чија је израда у току (др Владимир Турунташ).

Чланство у комисијама

Комисија за преглед и оцену мастер рада под називом: „Сојне разлике у локалном и системском имунском одговору у фази експресије реакције контактне преосетљивости на динитрохлоробензен у пацова“, кандидата Јелене Јовановић, Биолошки факултет, Универзитет у Београду (одлука: 15/259 од 12.06.2015. године).

Комисија за преглед и оцену и одбрану докторског рада под називом: “Топографија женских полних органа калифорнијског кунића Oryctolagus cuniculus domesticus”, докторанд mr Валентина Милановић: Факултет ветеринарске медицине, Универзитет у Београду (одлука: 01-15/48 од 23.12.2015. године, одлука: 01-24/5 од 23.03.2016. године, датум одбране доктората: 15.06.2016. године).

Комисија за преглед и оцену докторског рада под називом: „Имуноимодулаторни ефекти антикоагуланата варфарина код пацова“, докторанд mr Весна Субота: Биолошки факултет, Универзитет у Београду (одлука: 15/197 од 13.05.2016. године).

Коменторство у изради докторске дисертације:

1. mr dr med. Владимир Турунташ: “Дејство сталног магнетског поља на функцијске карактеристике хуманих мононуклеарних ћелија периферне крви *in vitro*“. Медицински факултет, Универзитет у Београду (одлука: 5940/2 од 24.12.2015. године)

Педагошки рад

У периоду од избора у звање вишег научног сарадника, др Василијић је у звању ванредног професора ангажован у извођењу наставе на Медицинском факултету ВМА Универзитета Одбране.

На интегрисаним академским студијама медицине на Медицинском факултету ВМА, др Василијић је наставник на предметима: Биологија са хуманом генетиком, Клиничка генетика, Биологија ћелије (руководилац предмета).

На академским специјалистичким студијама из Биоинжињерства и медицинске информатике на Медицинском факултету ВМА, др Василијић је наставник на предмету Имунологија и биологија ћелије за инжињере.

Од школске 2013/2014. др Василијић је ангажован на докторским студијама на Медицинском факултету ВМА, на којим учествује у настави на предметима: Хомеостаза и регулаторни механизми и Експериментални модели у биомедицини.

У досадашњем наставном раду, др Василијић је испољио стручност и вештину у излагању материје, као и спремност за пружање доданих информација у циљу мотивисања студената за научна истраживања. Поред тога, педагошки рад др Василијића укључује и менторски рад са кадетима на интегрисаним академским студијама медицине Медицинског факултета ВМА (једно менторство кадет Филип Мерњик, од октобра 2013. до септембра 2016. године).

Учешће у међународној сарадњи

У склопу међународне сарадње Универзитета одбране у Београду, др Василијић је у својству руководиоца тима (*Key person*), у периоду од октобра 2012. до јуна 2016. године, учествовао на ТЕМПУС пројекту: „Студије у биоинжињерингу и медицинској информатици“ (BioEMIS, 530423-TEMPUS-1-2012-1-UK-TEMPUS-JPCR). У склопу овог пројекта формирање су и акредитоване специјалистичке академске студије из биоинжињеринга и медицинске информатике на Медицинском факултету ВМА.

У оквиру усавршавања на Медицинском факултету Универзитета Харвард, од септембра 2016. године па надаље, др Василијић учествује у реализацији пројекта: Механизми сензоринеуралног губитка слуха: секреторни фактори (*Mechanisms of sensorineural hearing loss: secreted factors, 5R01DC015824-03*), који финансирају Национални институти за здравље, САД (*National Institutes of Health, Bethesda, Maryland, USA*). Пројекат се изводи у Болници за око и уво Масачусетса (*Massachusetts Eye and Ear*), Бостон, САД. На овом пројекту, др Василијић учествује у истраживањима везаним за испитивање молекулских маханизама деловања солубилних фактора туморске микросредине вестибуларног шванома на губитак слуха код особа оболелих од овог типа тумора. Поред тога, др Василијић учествује у испитивању имунске микросредине унутрашњег уха, радећи на моделима који укључују и примену индукованих плурипотентних матичних ћелија. Резултате својих досадашњих истраживања, са афилијацијом Медицинског факултета Универзитета Харвард, објавио је у два рада у којима дели прво ауторство и коауторство (174, 177).

Организација научних и стручних скупова

У мају 2015. године, на Војномедицинској академији у Београду, др Василијић је био организатор стручног симпозијума: „Биоинжињерство и медицинска информатика у савременој дијагностици и терапији“ (Београд, 15. мај 2015. године), на коме је председавао једном од сесија и излагао као предавач.

На VII Научном састанку Друштва имунолога Србије, који је одржан од 27. до 28. априла 2016. године у САНУ у Београду, др Василијић је био председавајући сесије: Имуномодулација.

6.3 Организација научног рада

Руковођење пројектима, потпројектима, задацима

До одласка на стручно усавршавање у САД, (септембар 2016. године), др Василијић је руководио пројектом под називом: „Функционални аспекти модулације имуногених и толерогених својстава дендритских ћелија (МФВМА/10/13-15, МФВМА/9/16-18), које је финансирало Министарство одбране Р. Србије. Пројекат се реализовао од 2013. године на Медицинском факултету ВМА Универзитета одбране у Београду.

У оквиру овог пројекта урађен је део докторске дисертације др Ивана Рајковића, под називом „Модулација диференцијације и функција хуманих лангерхансових ћелијаmonoцитног порекла *in vitro*“. Дисертација је одбрањена на Медицинском факултету Универзитета у Београду 13.07.2015. године. Из овог доктората произашла је и заједничка публикација са др Рајковићем у часопису M22 категорије (13).

6.4 Квалитет научних резултата

Резултати научно-истраживачког рада др Саше Василијића су објављени у укупно 199 библиографских јединица, осим објављене магистарске тезе и докторске дисертације. Укупан број објављених научних радова штампаних у целини је 57. Од тога је **један** рад у тематском зборнику међународног значаја (M14), **12** радова у врхунским међународним часописима (M21), **6** радова у истакнутим међународним часописима (M22), **20** радова у међународним часописима (M23), **једно** предавање по позиву са међународног скупа штампано у изводу, **6** саопштења са међународног скупа штампана у целини (M33), **једна** монографија националног значаја (M42), **два** поглавља у књигама националног значаја (M45), **4** рада у водећем часопису националног значаја (M51), и **8**

радова у научном часопису (M53). Др Василијић има 138 саопштења на међународним и домаћим научним склоповима и штампаних у изводу. Од тога је 109 саопштења на склоповима међународног (M34), и 29 саопштења на склоповима националног значаја (M64). Збирни импакт фактор објављених радова је 72,966. Радови др Василијића су без аутоцитата цитирани у 529 радова, са хиршовим индексом 13 (WOS).

Од избора у звање виши научни сарадник, односно после одлуке наставно-научног већа о предлогу за стицање звања виши научни сарадник, др Василијић је објавио једну монографију националног значаја (M42) и 13 радова штампаних у целини. Од радова штампаних у целини, један рад је у тематском зборнику међународног значаја (M14), три рада у врхунским међународним часописима (M21), један рад у истакнутом међународном часопису (M22), 6 радова у међународним часописима (M23) и два рада у научном часопису (M53). Др Василијић има једно предавање по позиву са међународног скупа штампано у изводу (M32), 11 саопштења са међународних склопова (M34) и два саопштења са склопова националног значаја (M64) штампаних у изводу. Збирни импакт фактор објављених радова је 18,211. Просечан број коаутора у радовима др Василијића након избора у звање виши научни сарадник износи 7,09. Од 13 укупно објављених радова *in extenso*, др Василијић је први аутор у два рада, од којих у једном дели прво ауторство.

На основу захтева Правилника, за реизбор у звање вишег научног сарадника је потребно 25 поена (половина од 50 поена), од чега др Василијић има 65,4 поена (56,51 нормираних). За групу радова-Обавезни 1, остварено је 57,5 поена (49,25 нормираних) од потребних 20, док је за групу радова-Обавезни 2 остварено 47 поена (38,75 нормираних) од потребних 15.

Табеле у прилогу дају сажети преглед постигнутих резултата научног рада др Саше Василијића до избора у звање виши научни сарадник (Табела 1) и након избора у звање виши научни сарадник (Табела 2).

7. ТАБЕЛА СА РЕЗУЛТАТИМА НАУЧНО-ИСТРАЖИВАЧКОГ РАДА

Сумарни приказ резултата научно-истраживачког рада др Саше Василијић :

Квантитативни показатељи научног рада пре избора у звање виши научни сарадник			
Назив групе резултата	Ознака групе резултата и вредност (број поена)	Број остварених резултата	Укупан број остварених поена
Међународни научни часописи (M20)	M21 = 8	9	72
	M22 = 5	5	25
	M23 = 3	14	42
Зборници међународних скупова (M30)	M33 = 1	6	6
	M34 = 0.5	98	49
Националне монографије и тематски зборници (M40)	M45 = 1.5	2	3
Радови у часописима националног значаја (M50)	M51= 2	4	8
	M53= 1	6	6
Зборници скупова националног значаја (M60)	M64 = 0.2	27	5.4
Магистрска и докторска теза (M70)	M71 = 6	1	6
	M72 = 3	1	3
Обавезни (1): M10+M20+M31+M32+M33+M41+M42		34	145
Обавезни (2): M11+M12+M21+M22+M23		28	139
УКУПНО		173	225.4

Квантитативни показатељи научног рада после избора у звање виши научни сарадник

Назив групе резултата	Ознака групе резултата и вредност	Број остварених резултата	Укупно поена	Нормиран број поена (више од 7 аутора)
Поглавља у монографијама и тематским зборницима (M10)	M14 = 4	1	4	4
Међународни научни часописи (M20)	M21 = 8	3	24	17.44
	M22 = 5	1	5	4.17
	M23 = 3	6	18	17.14
Зборници међународних скупова (M30)	M32= 1.5	1	1.5	1.5
	M34 = 0.5	11	5.5	4.92
Националне монографије и тематски зборници (M40)	M42 = 5	1	5	5
Радови у часописима националног значаја (M50)	M53 = 1	2	2	2
Зборници скупова националног значаја (M60)	M64 = 0.2	2	0.4	0.34
Обавезни (1) M10+M20+M31+M32+M33+ M41+M42+M90 (40)		13	57.5	49.25
Обавезни (2) M11+M12+M21+M22+M23 (30)		10	47	38.75
УКУПНО		28	65,4	56.51

МИНИМАЛНИ КВАНТИТАТИВНИ ЗАХТЕВИ ЗА СТИЦАЊЕ ПОЈЕДИНАЧНИХ НАУЧНИХ ЗВАЊА

За природно-математичке и медицинске струке

Диференцијални услов-	потребно је да кандидат има најмање XX поена, који треба да припадају следећим категоријама:		
Од првог избора у претходно звање до избора у звање.....		НеопходноXX=	Остварено
Виши научни сарадник	Укупно	50	65.4 (56.51*)
Обавезни (1)	M10+M20+M31+M32+M33+M41+M42+M90	40	57.5 (49.25*)
Обавезни (2)	M11+M12+M21+M22+M23	30	47 (38.75*)

(*) - нормиран број поена

Нормирање радова је извршено на основу Прилога 1. Правилника, под 1.4 Нормирање броја коауторских радова, патената и техничких решења (шести став), дељењем броја бодова у радовима са више од седам коаутора, према формули: $K/(1+0,2(n-7))$, $n>7$ (K - број "бодова рада према категорији", n – број аутора).

За реизбор у научно звање виши научни сарадник кандидат је обавезан да у периоду од пет година испуни најмање половину минималних квантитативних резултата потребних за избор у научно звање виши научни сарадник (Члан 35. став 2, Правилник о поступку, начину вредновања и квантитативном исказивању научноистраживачких резултата истраживача).

8. ЗАКЉУЧАК И ПРЕДЛОГ КОМИСИЈЕ

(за одлучивање упућен Наставно-научном већу, са назнаком из које шире и уже научне области, гране и дисциплине, кандидат стиче звање)

На основу увида у комплетну библиографски материјал др Саше Василијића, Комисија закључује се да др Василијић успешно бави истраживањима из области базичне имунологије са посебним освртом на испитивању функционалних особина дендритских ћелија у циљу развоја оптималних протокола модулације њихове функције.

У периоду од избора у звање вишег научног сарадника, његов научноистраживачки рад се реализује на три пројекта Министарства одбране и два пројекта Министарства просвете науке и технолошког развоја Р. Србије и пројекту Националног Института за здравље САД. У свом научноистраживачком раду, др Василијић користи савремене истраживачке технике и самостално учествује у областима истраживања дендритских ћелија. Искуства стечена у његовом досадашњем раду квалификовала су га да руководи научноистраживачким пројектом који је финансиран од стране Министарства одбране Р. Србије. У свим фазама рада, др Василијић испољава кооперативност, иницијативу у тимском раду, као и способност преноса сопствених искустава и знања, чиме пружа допринос образовању младих истраживача. У досадашњем наставном раду, др Василијић показује изузетну стручност и вештину у излагању материје, као и спремност за пружање додатних информација у циљу мотивисања студената за научна истраживања. Учествовао је у изради више магистарских и докторских теза, а након избора у звање вишег научног сарадника био је ангажован као члан комисије у оцени и одбрани једне докторске дисертације, као и оцени једног магистарског рада и једне докторске дисертације. Др Саша Василијић је тренутно коментор у изради једног докторског рада, чија је научна заснованост одобрена, а реализација у току.

Преглед објављених радова после избора у звање научног сарадника показује да се научноистраживачки рад др Саше Василијић одвијао у неколико истраживачких правца који указују и на његово учешће у реализацији научноистраживачке активности и у осталим научним центрима у земљи и иностранству.

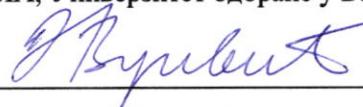

На основу прегледа целокупне публицистичке активности, анализе научноистраживачког рада, процене научних и стручних квалитета и увида у остале пратеће активности кандидата, сматрамо да виши научни сарадник др Саша Василијић испуњава све услове предвидјене Законом о научноистраживачком раду и Правилником о избору у научна звања за реизбор у звање виши научни сарадник и предлажемо Наставно-научном већу Медицинског факултета Војномедицинске академије да утврди испуњеност услова за овај реизбор.

У Београду, 22. 10. 2019.

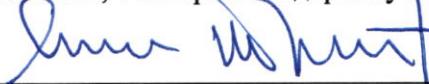

ЧЛАНОВИ КОМИСИЈЕ:

Академик проф. др Миодраг Чолић, научни саветник
професор емеритус Медицинског факултета ВМА, Универзитет одбране у Београду

Проф. др Драгана Вучевић, научни саветник
Медицински факултет ВМА, Универзитет одбране у Београду

Проф. др Алекса Трбовић, научни саветник,
Медицински факултет, Универзитет у Београду
